

Better Together

39 Years of Collaboration in St. Clair County

St. Clair County Community Services Coordinating Body

In the Beginning:

“SCC Model Life Services System Coordinating Body” began in 1984 as a state pilot project. Focus was on: coordination of services for vulnerable adults.

Executive level to focus on system and policy level decision, create networking, information sharing, and support. Began with 8 core members agencies, and CMH was lead

Initial Issues Addressed in 1985

AIDS	Farm Family Assistance
Interagency Coordination and Collaboration	Homelessness
Teen Pregnancy and Teen Parenting Issues	Issues of Abuse and Neglect

Structure Formalized 1986-1989

CMH was lead agency, Executive / Director level membership

Name Change to “**Human Services Coordinating Body**”

System and policy level decisions, Networking, information sharing, support

First comprehensive community needs assessment

Prevention planning

Workgroup level:

- | | |
|----------------------------|--|
| - identified a lead agency | - membership was line staff |
| - developed charge | - established goals and reported on progress |

2020 – 2021 The Pandemic Years...

March 2020 the United States ceased functioning as we knew it as a result of the Covid-19 worldwide pandemic. As a result, there were several executive orders issued requiring people to stay at home, schools went virtual, employees worked from home, many lost their jobs, businesses struggled, mask mandates were put into effect, hospitals were overflowing with covid positive cases, health care was restricted or went virtual, and the country waited for the magic of a vaccine.

During this time there were several steps forward and several steps backward regarding the pandemic. There were several scientific advancements: vaccinations were created, then boosters, ages eligible for vaccinations continue to expand, restrictions loosened, business re-opened, school started to meet in person again, etc. However with the development of new variants, restrictions would be put back in place.

CSCB's Response to the Pandemic

- ✓ Once meetings started again, they were virtual, allowing people to still participate
- ✓ Working with the Emergency Operations Center (EOC) a CSCB Website was developed as a depository of all types of updated Covid information; local, state and national
- ✓ A CSCB Facebook page was created to share information through social media
- ✓ Various Food Distribution Sites and Pop-up Mobile Pantries were collected and publicized as frequently as weekly initially and then down to monthly
- ✓ An emergency shelter was created at a local hotel to house individuals and families who were homeless until there was room in the shelters
- ✓ A group of stakeholders was created to help market accurate information regarding covid and to help promote vaccinations
- ✓ Workgroups began to meet and include covid updates and issues related to covid into their agendas
- ✓ Millions of dollars were given to SCC to address homelessness and eviction diversion
- ✓ does not apply to the CSCB
- ✓ Two more Annual Reports were created (2020 & 2021) with a focus on the CSCB's response to the pandemic and how well the collaboration of members helped to create a unified response as much as possible

2022-2023 Post Pandemic

As the national, state and local mandates regarding the pandemic expired, businesses and organizations began to operate in a "post pandemic world". This meant that business within the CSCB began to work on the issues it had prior to the pandemic as well as new issues that were created as a result of the pandemic, however many meetings included a hybrid option, (allowing members to attend in person or virtually).

- ✓ A new workgroup was created to combine all substance use supports regarding prevention, treatment and recovery of individuals of all ages. The new workgroup was named Substance Use Prevention, Treatment & Recovery (SU PTR)
- ✓ A partnership was developed of passionate stakeholders to look at the issues regarding opening and operating a men's homeless shelter. January – April 2023, a temporary warming shelter was opened. This group continues to work toward a permanent solution for men who struggle with homelessness and was added as an Ad-Hoc Committee within the CSCB structure
- ✓ 2nd Housing Summit sponsored by the Housing & Support Services Workgroup was held to address the many housing issues facing economically disadvantaged individuals and families.
- ✓ The Annual Community Resource Fair was a mobile drive through in 2022 and an in person event in 2023.
- ✓ The Community Health Improvement Plan (CHIP) was completed and the strategies are intertwined with the CSCB at various levels
- ✓ Associated Initiatives ended and new ones were added.

39 Years of Collaboration Means...

Changes

- Name has changed
- Leadership has changed
- Many issues have come and gone
- Some issues continue: health care, homelessness, transportation, poverty, children's issues, education, substance use, etc.
- Memberships has grown and is more inclusive
- St. Clair County Community Services Coordinating Body is one of only a few strong community collaboratives still in existence throughout the state of Michigan
- Issue driven, not money driven
- Focus on working together as a team to address issues, gaps and strengths of our community and membership.
- Able to survive a worldwide pandemic through shared communication, collaboration, coordination and teamwork

Accomplishments

- Millions of dollars have been captured and brought into SCC through collaboration
- Strategic Community Planning
- Data Collection and Analysis
- Ability to identify and tackle community needs / gaps
- Networking and Relationship building
- Information Sharing
- Reduction of duplication in services
- Stronger Community Partnership
- Recognized at the state level of working together
- Making a difference in many St. Clair County residents' lives!

Thank You for believing in Collaboration!
